MARKETING

THREE EASY STEPS TO THE PERFECT FIT.

Here's how you can find the perfect fit with the ASC concept for every customer quickly and easily:

1. ANALYZE

There are five different analysis devices to choose from that determine the foot type, length, width and other data concerning customer's feet. From the three-dimensional representation of both feet using the 3D Scanner VANDRA to the quick and easy-to-use Feet View, we offer the following devices for foot type analysis: 3D Scanner VANDRA, Podoscope, Feet View, FMD (Foot Measuring Device), Measuring Gauge Brannock (length and width measurement).

2. SELECT

Once the foot type has been determined, it is easy to find the appropriate insole, suitable Power Fit socks, and foam liners. Choose the product that is going to meet the customer's requirements for their sport or activity, whether it's skiing, snowboarding, hiking, running or working, and so on.

3. CUSTOMIZE

Regardless of whether they're Step-In, Fusion or 3D Custom, all insoles can be custom molded and fitted precisely to the foot of a customer through heating.

BOOTDOC offers a variety of tools for customizing insoles:

Heating: 3D Heater, Speed Heat Digital, Speed Heat Digital 3L, Heat Gun
Fitting: AUTOFIT BT, VAC IV Electric, Pillows 13, CMT-System

3-ARCH CONCEPT

THE FAST SOLUTION.

You can cover all activities choosing from four models and three different constructions, regardless of various foot types. Follow the simple foot analysis steps and select an insole from the four models in LOW, MID or HIGH Arch. Integrate the insole into the footwear by trimming and you're finished! Individual fitting can be offered as an extra service that ensures customers get a fit that is 100 % perfect. The wide range of insoles guarantees the right insole for every foot type.

LOW ARCH

The arch is incapable of cushioning, thus reducing the spring in the customers step or running motion. Displacement of the bones involved (e.g., buckling of the ankle bone, heel bone) can cause strain on tendons and ligaments. This leads to static imbalance and pain. The LOW Arch insole helps to prevent overpronation.

MID ARCH

The layout of the bones, tendons and ligaments reflects the theoretical norm. The pressure below the foot is distributed over the 3 main support points: heel (20 %), big toe base joint (17 %), small toe base joint (13 %). A MID Arch insole offers optimum pressure distribution for this type of foot, while stabilizing and cushioning.

HIGH ARCH

The long-arch is too high, thus reducing the contact surface. High medial and lateral arches are typically caused by shortening of the tendon structure or high muscle tension. These changes of the foot shape cause friction and pressure points when wearing shoes. A stressed tendon structure is often found throughout the body in this case. A HIGH Arch insole ensures comfortable, even pressure distribution for this foot type.

3D CUSTOM INSOLES

3D CUSTOM INSOLES

If you need a personalized solution, look no further than the BOOTDOC 3D CUSTOM insole range. In this segment, there are no compromises. The fitting process with 3D CUSTOM insoles from BOOTDOC is considered premium technology, and rightly so. It's not just about finding the perfect fit; it's also about passion, technology, know-how and most of all – a personal, thoughtful experience.

BOOTDOC IS OFFICIAL
INSOLE SUPPLIER OF
THE AUSTRIAN SKI TEAM.

3D RACE (5 PACK)

01-0400-183-x | Size: XS - XXL

The premium model for maximum performance.

- Perfect support and maximum transmission of energy thanks to a perforated PE Top-Grip surface (1.6 mm)
- Excellent precision thanks to the layer being extra thin
- External stabilizers

95

3D WIDE (5 PACK)

01-0400-185-x | Size: XS - XXL

The comfort model for extra wide feet and ski boot lasts.

- Maximum comfort thanks to a 2.0 mm PE cushioning layer
- Maximum stability thanks to an integrated mid and rear foot stabilizer (1.0 mm)
- For extra wide feet and lasts
- Slide zone in the arch area, which makes the boot easier to put on

- Self-adhesive tape included

3D INSOLE FITTING

1

Material is pushed back to the rear part of the pillows to form a plateau. Next, air is pulled out to create a vacuum.

2

The customer should sit in a 90-90-90 position with the legs hip-width apart and put the feet on the vacuum pillows. The VAC IV offers the possibility to adjust the width of the molding pillows! Then, enough air is pulled out to enable one of the feet to be copied.

TIP: The customer should apply no pressure to their foot at all, so that it can be positioned and copied correctly.

3

The heel should be pressed by the technician into the vacuum pillow while in a neutral position, and the area from the midfoot to the toes should then be carefully embedded in the pillow. Pull out more air to harden the cast.

4

Smooth out the pillow in front of and around the toes, so that an insole can be placed in the best possible position in the forefoot and toe area.

5

Heat the 3D Heater to the desired temperature, insert the insoles, and activate the timer. Avoid heating the insole too much and for too long as this will have a negative effect on the materials and the cooling time!

6

Position the heated insoles in the vacuum pillow starting from the heel and working toward the toes. Be sure to align the insole properly.

7

Ask the customer to stand on the insoles and put all their body weight on them for five minutes. Ensure the customer is standing with the feet hip-width apart when doing this. **ATTENTION:** Allow the insoles to cool down for a further five minutes so that they harden completely. Once the 3D insoles have cooled completely, you can remove them from the 3D VAC and finish them (by sanding, cutting and/or milling them).

3D CUSTOM INSOLES

HERE'S WHAT OUR CUSTOMERS HAVE TO SAY.

Layer-by-layer, create your own 3D design to suit your exact needs, and personalize it with your own logo! Insole technology made-to-measure!

Brent Amsbury,
Certified Pedorthist, owner Park City Ski Boot:

"Professional ski boot fitters know that the insole is the deciding factor in the perfect fit, and that the best results not only depend on knowledge and experience, but also on the quality of the selected materials. It's really satisfying to work with materials that provide excellent foot mapping. BOOTDOC insole blanks have been created according to my own specifications, which means that I can adhere to and control important criteria such as detailed foot mapping and deep contours. This provides the customer with the best possible support and comfort."

Marcel Hagleitner,
Sportshop Hagleitner, Saalbach:

"The bespoke shape of the insole is the most important thing for me. There's absolutely no question that the insole has to be a perfect fit in order to provide the best possible support and comfort. We are so impressed with the quality of BOOTDOC insoles that we have put our own company logo on them, which shows just how high the quality of the product is and how important proper boot fitting is to us."

BUILD YOUR OWN 3D CUSTOM INSOLE.

1 TOP LAYER 4 CHOICES OF MATERIAL TO BALANCE GRIP AND CUSHION

FOAM

The classic, economical choice. 2 mm or 3 mm of cushioning foam that also increases top surface grip.

JERSEY FABRIC

Polyester tight weave fabric that provides an economical solution for reducing surface friction and reducing blisters. This material can be shaped and styled in a number of colors and graphic patterns.

MICROFIBRE

Increases insulation and foot comfort through efficient moisture wicking. Reduces surface grip.

FUNCTIONAL-MESH

The premium top cover. Silver threads reduce odor, reflect heat back to the foot, and provide unique easy to enter surface that looks great.

MERINO

Be it spring, summer, autumn, or winter, the extremely fine fibers of Merino wool ensure effective temperature equalization and optimum foot climate.

2 MIDDLE SUPPORT LAYER 2.0 OR 2.5 MM HEAT MOLDABLE RESIN

- 2.0 mm for low volume applications such as racing or high performance freeride.
- 2.5 mm for general use and medium volume fitting.

3 BOTTOM SUPPORT AND REINFORCEMENT

PCL ARCH SUPPORT

This thermally moldable 2 mm performance plastic serves as a reinforcement layer for optimal support in arch and heel areas.

REFOSTAB

Heat moldable material in a selection of rigidities for the targeted control of the support and stabilization function in the necessary areas. Can be applied internally or externally.

Please get in touch with your BOOTDOC contact or send an email to office@boot-doc.com.

APPLICATION EXAMPLE

FUSION PRESHAPED INSOLES

The BOOTDOC Fusion Preshaped insoles are based on 3D CUSTOM Technology, but have already been preshaped for quick and convenient processing. Custom molding for the customer at the POS provides greater comfort, stability, and activity-specific support. Due to their construction, these insoles are designed to meet an extremely wide range of requirements and impress down to the very last detail.

OFFICIAL SUPPLIER
OF THE GERMAN SKI
NATIONAL TEAMS.

ALPINE

01-0400-176-x | Size: XS - XXL

The latest Fusion development with a 3D base construction for performance athletes.

- Comfort entry thanks to a Microfiber Top with anti-odor function
- Perfect pressure distribution and cushioning
- Maximum support thanks to integrated stabilizers

SENSATION

01-0400-177-x | Size: S - XXL

A Fusion insole with a 3D base construction that includes an antibacterial Microfiber Top for easy entry.

- Comfort entry thanks to a antibacterial Mesh Top
- Excellent comfort and extra light materials
- Dynamic in the forefoot area

MERINO

01-0400-180-x | Size: S - XXL

The MERINO is the ideal insole for use all year round. Be it spring, summer, autumn, or winter, the extremely fine fibers of the Merino wool ensure effective temperature equalization and thus an optimum foot climate.

- Tried-and-tested, durable POWER base construction
- Merino top for warm feet and optimum foot climate

POWER

01-0400-178-x | Size: XS - XXL

A best-seller developed specifically designed for foam injection and thermally moldable liners.

- Perfect support thanks to a perforated PE Top-Grip surface
- Maximum stability and support
- Optimum transmission of energy thanks to an extra thin design
- Slide zone in the arch area, which makes footwear easier to put on

MATERIAL

MARKETING

QUICK FOAM CONCEPT

for the Classic Foam and Performance Foam models

- Simple, fast, and uncomplicated
- No need to tape the feet
- Self-regulating foam volume system
- Membrane instead of tubing the forefoot area
- Asymmetrical tongue system
- Sealed seams for more warmth
- HF-fused foam areas (Classic and Performance models)
- Easy removal of the foam tubing

PRESSURE FOAM CONCEPT

for the Worldcup Foam model

- High-pressure foam design made from 2 components
- Asymmetrical racing tongue design
- HF-fused foam areas
- Adhesive material for problem areas
- Sealed seams for more warmth
- Spoiler for calf adjustment

CLASSIC FOAM (QF)

01-0900-070-x | Size: 22.0 - 31.0

NEW

The Quick & Easy construction that offers optimal support.

- Pleasant and easy entry
- 2 Spoiler for cushioning and calf adjustment
- Warmer feet thanks to a neoprene toe box, sealed seams and merino lining
- Fused foam pockets
- Tongue integration
- **NEW:** Anatomical performance for lasts
- **NEW:** Stretchable insoles for optimal fitting of last widths

PERFORMANCE FOAM (QF)

01-0900-050-x | Size: 23.0 - 31.0

The **PERFORMANCE FOAM** combines the design of the **WORLD CUP FOAM** with the sophistication of the **Quick Foam** concept.

- Optimum transmission of energy through racing inner lining and slim "performance" design
- Sole design
- Worldcup Foam design with membrane and Quick Foam concept
- Perfect fit due to asymmetric tongue
- Warmer feet due to neoprene toe box and sealed seams
- Fused foam pockets
- Redesigned tongue integration
- **NEW:** Anatomical performance for lasts
- **NEW:** Stretchable insoles for optimal fitting of last widths

95-102

WORLD CUP FOAM (PF)

01-0900-019-x | Size: 23.0 - 31.0

The liner for high-performance athletes that fits perfectly thanks to an asymmetrical racing tongue.

- Optimal transmission of energy thanks to a racing lining and slim racing structure
- Always fits perfectly thanks to an asymmetric racing tongue
- Strobel sole design
- Warmer feet thanks to a neoprene toe box and sealed seams
- Fused foam pockets
- Redesigned tongue integration

95-102

FOAM TONGUE

01-0900-007-x | Size: 22.0 - 31.0

An asymmetric, custom tongue for a precise anatomical fit.

- Easy to use thanks to a cartridge system
- Space-saving thanks to an extra thin structure
- Very comfortable foam

For foaming all Quick Foam models.

4 STEPS TO SUCCESS.

We all strive for maximum results and best sell through of our products. To be able to reach this goal we want to:

- Analyze market potential and select the right product and tooling mix.
- Train your sales staff to achieve the best customer satisfaction.
- Support in all aspects for the best sales results.
- Help you meet your sales target.

1

SELECT

- Definition of target group
- Selection of product group
- Evaluate quantity of sold footwear
- Analyzing the potential (footwear sales vs. insole sales)
- Selection of analysis and fitting tools
- Set targets per week/month/year

2

TRAIN

WINTER POWER FIT SOCKS

More performance, better support, and as a pleasant side effect, warmer feet that feel refreshed. BOOTDOC Power Fit Socks with graduated compression stand out from rivals because of their high-quality workmanship and maximum comfort.

WHY USE POWER FIT SOCKS?

The special technology used for Power Fit Socks enables them to provide evenly distributed pressure around the ankle with graduated compression from bottom to top. Power Fit socks gently support muscles and tendons during all activities. This helps keep your legs and feet feeling refreshed after even a long day of skiing, running, hiking or on your feet at work. The Power Fit design provides stabilizing support for the whole foot.

PERFORMANCE POWER FIT SOCKS

SOCKS PFI 90 SOUL / BEEDEE / ICE

S ↔ W PFI 90

01-0500-10x-x | Size: S - XL

High-quality compression socks from our high-performance series with the Tapevene function.

- Individual fitting possible thanks to S & W calf widths
- Optimal stability thanks to the Tapevene function
- Always fit perfectly thanks to elastic zones
- Shin bone protector
- Compression: strong – PFI 90, 18 – 22 mmHg (S) and 15 – 19 mmHg (W)
- Material: 80 % nylon, 20 % lycra

SOCKS SOUL

(S): 01-0500-102-x

SOCKS RACE PFI 50

01-0500-125-x | Size: S - XL

Thin racing sock with antimicrobial and anti-odor properties thanks to innovative copper thread.

- Racing sock with thin design
- Antimicrobial and anti-odor properties through the use of copper
- Reinforcements in the toe and heel areas
- Material: 59 % polyamide, 36 % polypropylene, 3 % copper, 2 % spandex
- Compression: soft – PFI 50, 10 – 15 mmHg

PFI 50

SOCKS PERFORMANCE MERINO

01-0500-130-x | Size: S - XL

Thin merino racing sock with antimicrobial and anti-odor properties thanks to innovative copper thread.

- Racing sock with thin design
- Antimicrobial and anti-odor properties through the use of copper
- Reinforcements in the toe and heel areas
- Material: 57 % wool (merino wool), 35 % nylon/polyamide, 4 % copper, 4 % spandex
- Compression: soft – PFI 50, 10 – 15 mmHg

PFI 50

WINTER FUNCTION SOCKS

SOCKS BLACK BASIC

01-0500-112-x | Size: S - XL

Multifunctional winter sports socks with protection from the cold thanks to wool (merino wool).

- Perfect protection thanks to shin bone protectors
- Fits perfectly thanks to stretch zones
- Very durable thanks to reinforcement in the ankle area
- Material: 36 % acrylic, 26 % nylon, 19 % polypropylene, 17 % wool (merino wool), 2 % elastane

BOOTDOC SOCKS IN YOUR DESIGN!

DESIGN YOUR PERSONAL SOCKS USING OUR ONLINE EDITOR.

Select. Design. Send your request.

Order your custom printed Power Fit Socks from BOOTDOC now.

Here's how it works:

1 SELECT YOUR DESIRED POWER FIT SOCKS.

Winter model (knee-high), summer model (ankle-high), basic coloring (color of toe and heel area). Material: 45% nylon, 35% polyester, 20% lycra.

2 PERSONALIZE THE POWER FIT SOCKS WITH YOUR OWN CUSTOM DESIGN.

You can design your Power Fit Socks in our Online Design Editor with practical 3D preview if you do not have a lot of design experience. You can also create your design using your own graphics program. To make things easier, you can download our Power Fit Socks print templates to import into your software.

3 SEND YOUR REQUEST.

Once you have completed your design, simply fill in the request form and send it.

4 CUSTOM PRINTED POWER FIT SOCKS STAND OUT FROM THE CROWD.

Be it for sports retailers, sports teams, clubs, hoteliers, or for marketing promotions, with printed Power Fit Socks from BOOTDOC, your market presence at the POS is strengthened and you will be remembered by your customers. BOOTDOC Power Fit Socks can be individually designed – from a total order quantity of just 300 pairs! Available in sizes S-XL (EU 35 – 48).

You can find our Online Design Editor

POWER FIT SOCKS

MULTISPORT POWER FIT SOCKS

More performance, better support and feet that feel refreshed. BOOTDOC Power Fit Socks with graduated compression stand out from rivals because of their high-quality workmanship and maximum comfort.

WHAT IS THE POWER FIT INDEX?

The Power Fit Index (PFI) indicates how strong the overall level of gradual compression is: PFI 30 designates light compression, while PFI 90 is classified as strong and is therefore only found in our performance series.

PRO SERIES POWER FIT SOCKS

SOCKS TAPEVENE PFI 90

01-0500-xxx-x | Size: S - XL

Outstanding properties thanks to optimal compression and the Tapevene function.

- The tape function stabilizes the muscle structure keeping the ankle joint in place
- Ideal for accelerating recovery
- Always fit perfectly thanks to elastic zones
- Compression: strong – PFI 90, 18 – 25 mmHg
- Material: 72 % nylon, 28 % lycra
- New toe seam construction

HOTRONIC

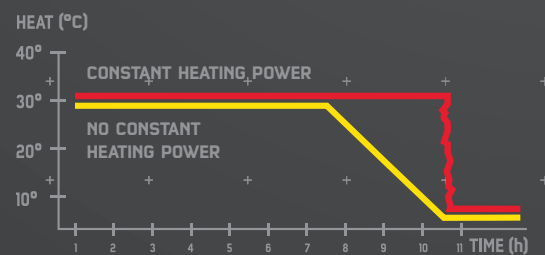

HOTRONIC's XLP ONE series has raised the bar to new heights for foot heating systems. A special lithium-ion technology has been combined with the latest electronics to enable one battery to be used for both the heated socks and heated soles. The cylindrical and ultralight heart of the new XLP ONE battery pack guarantees constant heating power throughout the battery runtime – even at extremely cold temperatures!

HEAT GENERATION

The XLP ONE battery guarantees constant heating power for several hours of heat generation – even at extremely cold temperatures! The CLASSIC and SURROUND heating element is designed to evenly distribute heat across the whole of the toe and ball of foot area.

XLP CONSTANT HEATING POWER CHART

— = THE HEATING PERFORMANCE OF THE LITHIUM-ION BATTERIES

Unlike that produced by conventional batteries, the heating power here remains constant irrespective of the battery pack's level of charge. Even after many hours of use, the heating power remains consistently high.

HOTRONIC®
HEATING SYSTEM **BOOT DRYER**

MICRO DRY

01-0100-5205 | 110-230 V | 12 V

Compact electric shoe and boot dryer.

We're all familiar with that unpleasant feeling of walking around in cold, wet shoes. Thanks to the MICRO DRY, this is now a thing of the past! The handy shoe and boot dryer for the home and on the go dries ski and snowboard boots, winter boots, casual footwear, sneakers, and work boots gently and efficiently. Gentle drying means that the material is not damaged or even deformed. With its compact dimensions, this lightweight drying device can be placed in the smallest bag and can be conveniently taken anywhere.

The MICRO DRY is extremely flexible. You can use it at home or in a hotel, when you're off out for a day of winter sports, or on the way to work: simply plug it in to the 12 V cigarette lighter in your car and preheat your shoes.

- Drying temperature that is gentle on the material to ensure a longer lifetime for your shoes and boots
- Optimum heat circulation
- Protection against overheating (max. 70 °C)
- Included in the scope of delivery are a 110 V plug, a 230 V plug, and a 12 V car adapter
- 6 watts

APPLICATION OPTIONS

HOTRONIC® BOOT, GLOVE AND HELMET DRYER

TECH DRY

01-0100-5206 | 110 V 01-0100-5207 | 230 V

Electric dryer for shoes, boots, gloves, and helmets.

Using warm air, TECH DRY dries wet shoes, boots, ski boots, and gloves, as well as motorbike, bicycle, and horse-riding helmets, in a short time and without damaging the material. Even leather boots and shoes can be dried thoroughly and with care. As soon as an item of clothing is pulled over the drying attachment, the program starts automatically and warm air is blown from the inside through the clothing.

In the winter months, the TECH DRY is indispensable for all those who like to be outdoors whatever the weather, and it can also be used for preheating. Dry clothing is also important for your health!

- Time and temperature setting
- Temperature scale up to 70 °C
- Automatic sensor for start and stop function (can also be set manually)
- Digital display 
- Overtemperature switch-off for greater safety
- Quiet operation
- Removable attachment for shoes, boots, or helmets
- Scope of delivery: 110 V, 230 V plug; 2 x
- 300 watts

Attachment for shoes, boots, gloves;
2 x attachment for helmets

APPLICATION OPTIONS

ANALYSIS & FITTING

Professional fitting is based on analysis of the foot. From the three-dimensional representation of both feet using the BOOTDOC 3D Scanner VANDRA to its easy-to-use Feet View, BOOTDOC offers several devices that revolve around this. Because each BOOTDOC insole can be heated and custom molded and BOOTDOC has designed specific heating devices for each category of insole and customization. Depending on the style of insole, and experience of the shop, the BOOTDOC insoles can be customized by using a specialty VAC system or molding pillows.

3D SCANNER VANDRA

SIMPLE. FAST. 3D.

3D SCANNING IN A NEW DIMENSION

The new BOOTDOC Scanner Vandra, developed in cooperation with the Swedish technology start up Volumental, sets new standards in 3D visualization of feet.

THE TECHNOLOGY

Thanks to the latest technology of 4 depth compensation cameras both feet are measured and 3D rendered within a few seconds. The visualized 3D picture is of the highest precision and can be analyzed from various angles:

THE ANALYSIS

Just step on the 3D Scanner without any other device. No changing of socks or special equipment is required. This guarantees efficiency, high comfort, and no hygiene hassle during the analysis process.

INFORMATION DATA

The 3D Scanner Vandra offers vast information about, and eleven measurements of, the foot. The result is visualized in the split-screen app on the tablet. The left side shows the 3D rendered foot which can be looked at from all angles with zoom in /out function. The right side allows you to scroll up or down to view all the measurement data.

- Length and width of both feet as well as size recommendation in US, UK, EU, MP with manual correction option
- Visualization of the foot type LOW/MID/HIGH arch
- Zoom in/out function on the 3D model
- Instep height and heel circumference
- Instep length as well as width and volume recommendation
- Measurement information can be e-mailed to clients

THE DATA

The result of the analysis is a vast number of information and measurements around the foot. The Vandra can not only provide length and width but also arch type, instep height, volume recommendation and other useful information to allow for the best customer service. The data is anonymously stored in an online cloud and is being used for further developments around the footwear and insole business.

THE SIMPLICITY

It's amazing how simple it is to use the Vandra 3D Scanner. The plug & play version includes an intuitive portable touchscreen tablet that is easy to use. The analysis process is done within a few seconds and can be discussed with the customer using the tablet for visuals.

ANALYSIS SYSTEMS

3D SCANNER VANDRA

01-2300-110 | Size: D 67 x W 80 x H 32 cm

The new Vandra 3D foot scanner delivers a three-dimensional image of both feet in seconds.

It provides a wealth of measurement data on instep height, ankle circumference, inner feet length and so on while also recommending sizes. The data can be used to find the right ski boots / sport shoes and insoles quickly. A high level of hygiene and comfort are guaranteed because customers can keep their own socks on while using the scanner, thus eliminating the need to remove their socks.

A permanent connection to the Internet via WLAN or LAN is necessary.

2D FOOT ANALYSIS

PODOSCOPE 4 (INCL. L & W MEASURING GAUGE)

01-2300-146 | Size: D 79 x W 58 x H 117 cm

Precise display of the foot type (LOW, MID or HIGH Arch) via an LED illuminated glass plate.

- Professional analysis and fitting are possible even in very small areas
- Heating and fitting devices can be combined perfectly
- Speed Heat Digital and Molding Pillows need to be ordered separately

OPTIONAL ACCESSORIES PODOSCOPE

LASERSET

01-2300-057

- Used to align the leg axis

PODOSCOPE CASTORS

01-2300-076

- Make moving the device easy

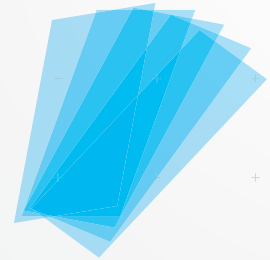

FEET VIEW

01-2300-072 | Size: D 48 x W 25 x H 5 cm

The FEET VIEW offers the simplest form of foot analysis that determines foot arches and sizes quickly.

- Integrated length and width measurement
- Uses a non temperature specific foil, which allows year round use

FOIL FOR FEET VIEW
01-2200-049 | 5 pcs. / units

FMD FOOT MEASURE DEVICE

01-2300-118 | Size: 47 x 52 cm

- Robust and simple foot measuring device
- Displays the length of the foot/shoe size as well as the width of the foot
- Classifies the foot as narrow/medium/wide
- Folding mechanism for easy cleaning

MEASURING GAUGE

A robust foot measuring gauge for precise Mondopoint determination of the foot length and width in millimeters.

BRANNOCK JUNIOR
57-305-007
Size: up to MP 24.0

COMBINATIONS

FIT CENTER

01-2300-142

The Fit Center has a new ergonomic design and comes in a number of different configurations.

- Modular, compact analysis and adjustment center
- Electrically height-adjustable seat and height-adjustable handholds
- Removable module for analysis options

Electrically height-adjustable seat

COMPACT DESIGN
D 81 x W 77 x H 131 cm

Analysis and molding tools are purchased separately

PODOSCOPE FOR FIT CENTER (110/230V)

INCL. L & W MEASURING GAUGE

01-2300-143 | Size: D 58 x W 44 x H 20 cm

Precise detection of the foot type (LOW, MID or HIGH arch) via an LED illuminated glass plate.

- Professional foot analysis in the smallest footprint

Accessories for the PODOSCOPE and FIT CENTER can be found on the following pages.

AUTOFIT BT

THE FITTING SYSTEM FOR INSOLES.

Discover now:
boot-doc.com/autofit

THE AUTOMATED FITTING SYSTEM FOR INSOLES.

The newly developed, patent-pending AUTOFIT system adapts insoles to the customer's foot shape automatically and in next to no time. All functions are easily controlled from a tablet or cell phone via Bluetooth. The Fit Pods are electrically adjusted to the respective hip width and the preheated insoles are pressed against the foot using a special membrane and air pressure

FROM FORE FOOT TO HEEL.

To facilitate optimum positioning of the insoles in the Fit Pods, a vacuum is generated first. The fore foot covering is adjusted to the correct shoe size and the preheated insoles are inserted. The customer then places their feet on the insoles. Depending on their preference, this fitting can be done while sitting or standing. A laser helps to align the knee and lower leg.

After switching the AUTOFIT from vacuum to air blowing, the membrane is pressed against the foot from the fore foot to the heel. The weight of the customer and the type of fitting can be defined and/or controlled via Bluetooth.

The preheated and thus flexible insole hardens in the exact shape formed by the foot with a partial weight bearing. The result is a perfect fit! The processing time can be adjusted precisely within a predefined time frame and optimized for the respective insole type. Errors in insole production are prevented thanks to the simple, quick, and automated procedure, and reproducible results are ensured. This technical innovation allows for the adaptation of STEP-IN, FUSION, and also 3D insoles.

The Fit Pods and the membrane can be easily replaced if required. AUTOFIT is offered as a stand-alone solution, but can also be integrated into the AUTOFIT CENTER BT. Along with hand holds, it is also equipped with a seat height adjustment, which can also be controlled via the tablet so that the customer can always maintain a 90° position to the Fit Pods for a seated fitting.

AUTOFIT BT

01-2300-157 | Size: D 55,5 cm x W 65,3 cm x H 15,7 cm

The AUTOFIT BT as a stand-alone solution with adjustable membrane for the customization of insoles.

- Automatic insole adjustment in compact design
- Electric hip width adjustment
- Laser-assisted leg axis alignment
- **NEW:** Control via app with Bluetooth function
- Smartphone with installed app included

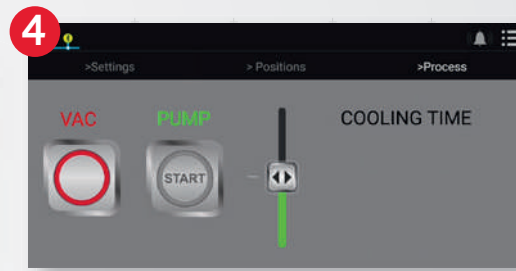

SILICONE AUTOFIT BT
01-2300-155 | 2 pcs. / units

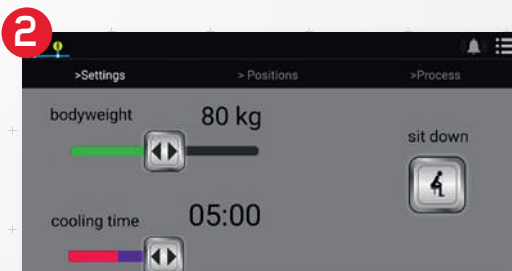

CONTROL VIA APP WITH BLUETOOTH

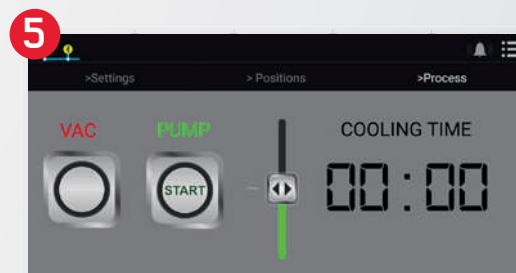

Open / Start the pre-installed app on the supplied smartphone.

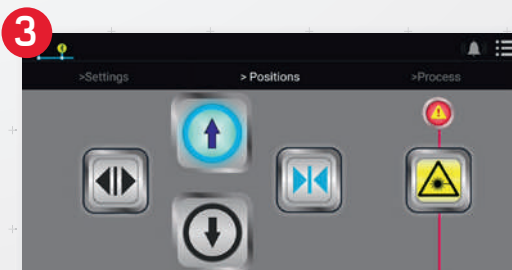

Start of the process by creation of the vacuum; positioning of the Forefoot cover and insertion of the warm insert.

Adjusting body weight and Cooling time and whether seated or standing is adapted.

After positioning the feet on the preheated insoles, START of the Adjustment process by PUMP. During the fitting procedure the pressure as well as the cooling time can be changed.

- Adjusting seat height and position the Fit Pods
- On / Off the laser function

OPTIONAL ACCESSORIES AUTOFIT BT

AUTOFIT POD LEFT

01-2300-153

- Membrane system with air pressure application for the customization of insoles

AUTOFIT POD RIGHT

01-2300-154

- Membrane system with air pressure application for the customization of insoles

SMARTPHONE FOR AUTOFIT BT

01-2300-159

The smartphone is needed to use the AUTOFIT BT. Model and colour may vary from product shown.

COMBINATIONS

AUTOFIT CENTER BT

01-2300-158 | Size: D 115 cm x W 82 cm x H 85 cm

The AUTOFIT CENTER BT with integrated AUTOFIT BT boasts an ergonomic design and compact dimensions.

- Modular, compact fitting center with small dimensions
- Electric, height-adjustable seat and height-adjustable, rotatable handles
- Retractable module for compact storage

ADJUSTABLE SEAT HEIGHT

AUTOMATIC INSOLE ADJUSTMENT - AUTOMATIC INSOLE SALES.

INTERSPORT PILZ IN HARTBERG

For Intersport Pilz, boot fitting has been a part of everyday life at Intersport Hartberg for many years. The store is excellently equipped with the Vandra 3D foot scanner and the new AUTOFIT insole fitting device. Store Manager Thomas Bierbauer tells us about his experiences.

BOOTDOC: 2019 you started using the new AUTOFIT, which automatically adjusts insoles. What are the advantages from your point of view?

Thomas Bierbauer: We use the AUTOFIT every day and we are very pleased with it. Previously we had just two loose cushions. This device allows the customer to sit down comfortably during the fitting process, which is considerably better. It also puts on a good show. The other customers watch it working and want to try it out, meaning that we

can sell more insoles. We mainly use the AUTOFIT for the more expensive Fusion insoles.

BOOTDOC: How are you colleagues finding the AUTOFIT? Is it easy to use?

Thomas Bierbauer: After a short training session, the AUTOFIT is very easy to use. Everyone gets the hang of it once they have done it once – whether they are an apprentice or a workshop technician. Above all, boot fitting is an import-

ant unique selling point that sets us apart from online companies. Customers can't get their insoles fitted via the internet! Visiting a specialist who lives and breathes boot fitting is a no-brainer. For example, we get customers who have to wear heavy work shoes and who want to have insoles made.

BOOTDOC: Thank you very much for this fascinating insight.

FITTING SYSTEMS

VAC IV ELECTRIC (110/230 V)

01-2300-140 | Size: D 59 x W 52,4 x H 15 cm

Electric Vacuum Casting System for molding custom insoles.

- 2 separate, large silicon cushions with additional width-adjustment feature provide for perfect processing
- Speed regulator ensure optimum cushion firmness and air pressure
- High-quality silicon for longevity and excellent heat absorption
- Anti-slip protection in cushion area

SUITABLE FOR FIT CENTER

PILLOW VAC IV

01-2300-141 | Size: D 43 x W 22 x H 5 cm
Robust, replacement cushions for the VAC IV electric.

COOL PACK
01-2300-145

CMT (CUSTOM MOLDING TOOL)

01-2300-095 | Size: D 55 x W 64,5 x H 8 cm

The CMT allows precise and simple customizing of Step-In and 3D insoles, with no power supply needed. The casting is carried out by a special wax inside the chambers.

- Durable thanks to high-quality materials
- Easy to use
- Hip width can be adjusted manually (no tools needed)
- Molding can be carried out quickly and precisely
- Pre-molded pillows for both the right and left foot
- **NEW:** Silicone molding surface

SUITABLE FOR FIT CENTER

CMT LEFT REPLACEMENT

01-2300-104
Size: D 49,5 x W 26 x H 6,5 cm

CMT RIGHT REPLACEMENT

01-2300-105

SUITABLE FOR FIT CENTER

PILLOWS 13

01-2300-058
Size: W 17 x L 42 x H 9 cm

Molding pillows that enable Step-In insoles to be fitted quickly.

SILICONE COVER 012 (REPLACEMENT)
01-2300-055

SUITABLE FOR PODOSCOPE

FOAMING WEDGE

10-3100-283
Size: D 44 x W 57 x H 10 cm

SUITABLE FOR PODOSCOPE

Foam wedge that enables foam liners to be fit perfectly.

HEATING SYSTEMS

3D HEATER (110/230 V)

01-2300-018 | Size: D 50 x W 40 x H 10,5 cm

Heats up 3D Custom insoles quickly and precisely.

- Heats all layers evenly
- Time and temperature can be set individually
- Easy cleaning thanks to glass-ceramic surface

SUITABLE FOR
FIT CENTER

SPEED HEAT DIGITAL (230 V)

01-2300-086 | Size: D 15 x W 31 x H 26 cm

The device that heats Fusion and Step-In insoles to the recommended temperature within seconds.

- Integrated SPEED HEAT LAMP (x2) + one replacement lamp
- Attention:** Lamps are included and not built in, to avoid damage during transport
- Digital variable heating time setting

SPEED HEAT DIGITAL 3L (230 V)

01-2300-132 | Size: D 15 x W 31 x H 26 cm

- Switchable lamp in the heel area to heat this area as well
- Digitally adjustable heating time settings
- Includes one replacement lamp

SPEEDHEAT FIXATION FOR FITCENTER

FITTING TOOLS

FITTING TOOL SET

INCL. CASE 01-2100-047

ONLY CASE 10-5000-031

- Includes Wooden Last Set II, ALU ANKLE PARTS and LENGTH EXTENSION

FIX 4 HEEL

01-2100-101-2 **SMALL**

01-2100-101-4 **LARGE**

- Improved heel support in ski boots with the Fix4Heel system
- Individually adjustable for optimum heel support

WOODEN LAST SET II

01-2100-085

- Newly developed shapes and geometries.

PRESS TOOL

01-2100-048

- Easy to use thanks to its manual screw, hydraulic pump function
- Includes LENGTH EXTENSION

HYDRAULIC PRESS II

01-2100-095

- Easy & quick use in any area of the skiboots
- Hydraulic hand pump with safety valve (> 95 bar)

HYDRAULIC PRESS SET II

01-2100-088 | Size: 40,5 x 39,5 cm | 2,5 kg

- Easy & quick use in any area of the skiboots
- Hydraulic hand pump with safety valve (> 95 bar)
- Flexible hydraulic tubing with expanding piston
- 5 different extension parts
- 7 different shapes

TONGUE GUN

55-530-345

- For injecting the tongue foam cartridge

ANKLE HAND SET

INCL. CASE 01-2100-044

ONLY CASE 10-5000-030

- For expanding the ankle and other points of the shell
- Includes MOUNTING POST

ALU ANKLE PARTS PRESS TOOL

01-2100-079

- Specially designed for stretching specific areas of ski boot shells.

PRESS TOOL LENGTH EXTENSION

01-2100-078

- For use with the press tool for stretching the length of shoes.

FLEXIBLE SHAFT GRINDER

- 1 55-104-320 Basic device
- 2 55-104-322 Flexible shaft L = 1.5 m + collet wrench

ULTRACAM TOOLS

ULTRACAM UP BASIC (1 STRETCH + 1 ANKLE ARM)

01-2100-114

- Separate controls for temperature and time
- Swiveling ankle stretch arm in order to be able to reach all areas in the ski boot
- Equipped with compressed air cooling to cool down ski boots in approx. 20 min.
- Three sets of milled ankle stretch forms
- Three pairs of lasts with various small adapters

ULTRACAM UP EXTRA STRETCH ARM

01-2100-115

- Second stretch arm for ULTRACAM UP BASIC
- Can be easily mounted on the basic device
- Equipped with compressed air cooling to cool down ski boots in approx. 20 min.

ULTRACAM STAR ANKLE ARM SINGLE, ELECTRIC

01-2100-116

- Swiveling ankle stretch arm in order to be able to reach all areas in the ski boot
- Separate controls for temperature and time
- Three sets of milled ankle stretch forms
- Equipped with compressed air cooling to cool down ski boots in approx. 20 min.

ULTRACAM STAR ANKLE SET DOUBLE, ELECTRIC

01-2100-119

- Can handle two ski boots simultaneously and independently from each other
- Swiveling ankle stretch arm in order to be able to reach all areas in the ski boot
- Separate controls for temperature and time
- Three sets of milled ankle stretch forms for each arm
- Equipped with compressed air cooling to cool down ski boots in approx. 20 min.

* Digital gauge not included

ULTRACAM STAR ANKLE ARM SINGLE (WITHOUT TIME AND TEMPERATURE CONTROL)

01-2100-118

- Swiveling ankle stretch arm in order to be able to reach all areas in the ski boot
- Three sets of milled ankle stretch forms

AIRCOOLING SET FOR ULTRACAM UP & STAR (FOUR-WAY)

01-2100-117

- Compressed air hose set for ULTRACAM UP and STAR devices
- Easy installation: Connect the air-cooling set with the respective ULTRACAM device and the compressed air generator, open the respective air valves and cool down the heated ski boots in approx. 20 min.

ULTRACAM STAR SET ANKLE STRETCH FORMS 3 + 3 (MILLED)

01-2100-120

- Milled ankle stretch parts with a smooth surface
- Includes two sets of round ankle parts in two sizes and a set with an elliptical shape

DIGITAL MEASURING GAUGE FOR ANKLE ARM

01-2100-121

- Can be mounted on all ULTRACAM STAR ankle stretch devices and ankle stretch arms of the ULTRACAM UP and helps to determine and track the deformation depth

WORK BENCH

55-125-200 | Size: D 52,5 x W 80 x H 90,5 cm | with wheels and drawers

Incl. wooden worktop, wheels and 3 lockable drawers, the perfect bench for any boot fitting tools.

BOOTDOC ACADEMY

UNIQUE BOOT-FITTING TRAINING PROGRAM.

The BOOTDOC ACADEMY program is a unique boot-fitting training program and offers every technician an introduction to, or advanced training in, boot fitting. Learn from top professionals and pick up tips and tricks that will enable you to provide your customers with the best footwear fitting service. Since the number of participants is limited, individual assistance is guaranteed during the seminar, and there is sufficient time to practice skills directly on the products.

Newcomers should choose the basic boot fitting seminar, while more experienced participants can register directly for the ADVANCED course.

- Bring your own ski boots or some old ones so that they can be ground and expanded.
- You will receive precise details of what the program involves, hotel options, the location and how to get there after you have registered. Please send your registration to office@boot-doc.com.
- Every participant will receive a personal certificate and participation confirmation from the **BOOTDOC BOOT-FITTING ACADEMY**.

CW = CALF WIDTH

THE POWER FIT INDEX

The Power Fit Index (PFI) indicates how strong the overall level of gradual compression is: PFI 30 designates light compression, while PFI 90 is classified as strong and is therefore only found in our performance series.
