One-Stop Bike Services

Perfect for sports retailers, Municipal authorities & Tourism

Part of the WINTERSTEIGER strategy is to be a one-stop supplier: we provide solutions for the cleaning and storage of bicycles, as well as hygienic storage and gentle drying of sportswear. We develop software for the management of bike rental, repair, and servicing operations. Bike cleaning accessories and tools, matched with our first-class after-sales service, enhance the complete package provided.

Contents:

CLEAN: Bike cleaning solutions _____	6
MANAGE: Development of software for managing bike rental, repair, and servicing operations _____	14
STORE: Stable storage system for all types of bike _____	16
DRY: Gentle and hygienic drying solutions for sportswear _____	18

Your one-stop supplier.

Veloclean

The bike wash station for manual cleaning or pre-cleaning.

Velobrush

The bike wash station for fully automated cleaning.

CLEAN DRY STORE MANAGE

Easyrent & Easywork

Rental and service software.

Drying solutions

Sportswear, workwear,
and business attire.

Easystore

Sturdy storage system
for bicycles.

Veloclean

The bike wash station for manual cleaning or pre-cleaning.

The Veloclean offers everything you need for the pre-cleaning or manual cleaning of a bicycle. It can be used as a stand-alone system both outdoors and indoors. Compressed air can be supplied by either an integrated compressor or with the use of an existing external compressor. Two integrated

containers are used to store clean water and cleaning agents for washing up to 100 bikes. Cleaning the bike takes place at a comfortable ergonomic working height, making it the ideal device for a variety of applications, from self-service terminals to professional bicycle rental and repair shops.

wintersteiger.com/veloclean

Self-service payment terminal

**Easy do-it-yourself cleaning.
With low pressure.**

Sports retail

Municipal authorities

Tourism

Veloclean

Your benefits summed up:

- A mobile system mounted on wheels, so it can be placed exactly where it is needed
- Low water consumption from 2 liters/bike
- Built-in compressor, containers for water and cleaning agents – can therefore be used indoors and outdoors without a direct connection to running water and drainage
- Drip tray for environmentally friendly and proper disposal of waste water
- Pleasant, ergonomic working height
- Can be used as a self-service station with payment terminal or for professional use in bicycle rental or repair shops

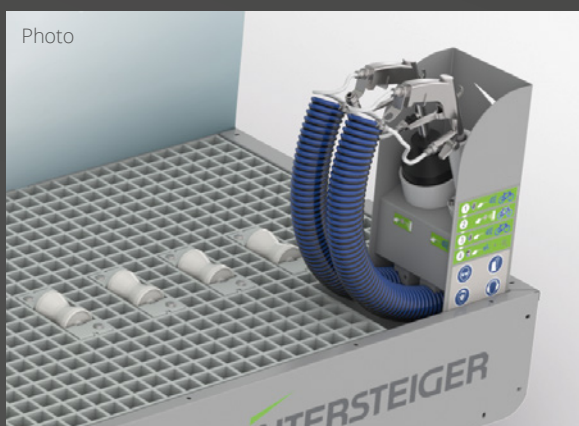

Veloclean

Technical data

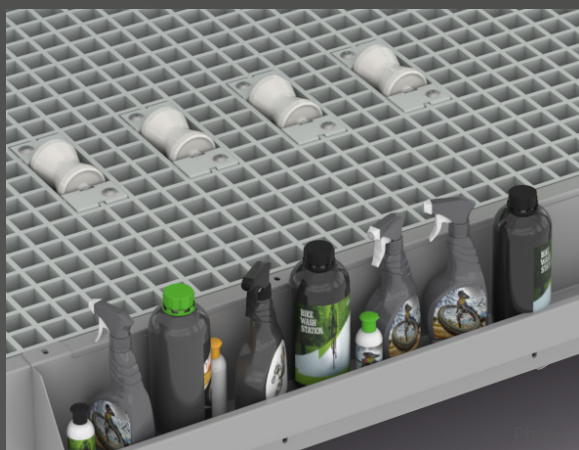

Supply voltage	1 AC 230 V, 50 Hz
Connected load	1,6 kW
Rated current	7 A
Supply voltage	2/N AC 240 V, 60 Hz
Connected load	1,6 kW
Rated current	13 A
Weight	285 kg (705 lbs)
Dimensions (L x W x H)	2200 x 1200 x 1450 mm (86.8 x 47.3 x 44.9 in)

We reserve the right to make technical modifications.

Bike mount with quick release fastener (height-adjustable)

Velobrush

The bike wash station for fully automated cleaning.

Bicycle components, the electronics on e-bikes, and sensitive high-tech carbon frames need to be cleaned extremely gently. This is one reason why manual cleaning has typically been favored for top-quality bikes – until now! The WINTERSTEIGER Velobrush can be used to gently clean all types of bikes using low pressure and a gentle brush technology. It offers time savings and makes the cleaning process easier – in both service workshops and professional bike rental stores.

Innovative cleaning concept.

The Velobrush impresses with its innovative concept using horizontal rotating brushes. An independent cleaning unit ensures tires and rims are cleaned. Fully closed system with attractive exterior protects against over-spray and ensures the work area stays clean. The integrated powerful filter system reduces water consumption to a minimum.

The bicycle is fed into the machine via an ergonomic transport carriage. The system is equipped with wheels for use as a mobile station, or it can be used in a stationary position with the integrated feet.

Support from planning to operation

Additional software modules:

- Easyware merchandise management
- Easydepot storage solutions
- Easygate process optimization

Storage made easy: Easystore hanging system

Sturdy storage system for mounting to a wall or ceiling.

In contrast to other systems, the Easystore bike hanging system uses spring-loaded hooks, making the mounting and removal of the bike much easier. The hooks are very tough and can hold weights of up to 50 kg: From lightweight racing bikes to fatbikes, every type of bike can now be stored quickly and easily. The bike hanging system is compatible with the tried-and-tested Easystore storage system for skis.

The Easystore ski racks can be easily repurposed during the summer for bike rentals. The hooks have to be ordered separately, but can be installed very quickly. The hanging system can be installed on a wall or on the ceiling. Make best use of the available space with a bike hanging system: Create storage space for twice as many bikes compared to storing them next to each other.

The bike hanging system is compatible with the proven Easystore ski storage system.

You can find more information
in the Easystore brochure or at
wintersteiger.com/easystore.

Our drying systems can be perfectly tailored to fit any space using custom design options.

Both the closed and open drying systems have proven their worth and impress with their energy savings and quick & gentle drying.

Drytech

Drying solutions for sportswear, work and business attire.

Our drying lockers fulfill all expectations with regard to the hygienic drying of sportswear and work attire. The Sterex plasma technology disinfection process is harmless; it prevents that musty smell when clothing is put away wet and gets rid of any unpleasant body odors. This means that protec-

tive clothing and sportswear does not have to be washed as often, which is good for the material (especially special coatings) and the environment. The trip home or onward journey will always start with fresh, dried clothing and equipment.

Drying and hygiene technologies.

SpeedDry

Rapid air circulation drying.
A high-quality air circulation fan combined with heated air ensures material-friendly and energy-saving equipment drying.

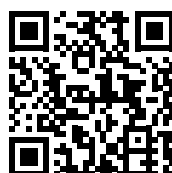

GreenDry

Energy efficient condensation drying.
As well as recirculation drying, Drytech drying solutions also offer highly energy efficient and economical condensation drying. The lockers use up to 60 % less energy than comparable products!

Sterex plasma technology.

Make germs and unpleasant odors a thing of the past!
The Drytech drying solutions use cold plasma to efficiently kill bacteria, molds, viruses, and spores in an environmentally friendly manner.

You can find more information in the Drytech brochure or at wintersteiger.com/drytech.
